

SECURE REMOTE ACCESS CONTROL ANYWHERE, ANYTIME

Key Features:

- Connect directly to your existing network infrastructure
- Demonstrated firewall-friendly web socket protocols
- Secure, encrypted (SSL/TLS) connections
- Forward with variety of TCP/IP based protocols, inc. HTTP(S)
- Highly scalable up to thousands
- Customize freely via API

Always Connected— Always on Control— Always New Opportunities

Linear Remote Management Console (RMC) is uniquely designed for security solutions, leveraging Linear ecosystem. Linear RMC provides secure, remote, simultaneous connectivity to multiple access, video and security systems, even if the device is located in private or mobile network behind a router or firewall.

Linear RMC incorporates encrypted firewall tunneling technology linked to remote back-end services, providing enhanced security and easy set-up. You and your customers can manage their systems remotely with any device or platform, making RMC superior, leading edge alternative to port forwarding and VPN networks,

Linear RMC software provides a scalable and truly secure platform for remote management, empowering you to drive recurring monthly revenue (RMR) based services.

LINEAR REMOTE MANAGEMENT CONSOLE

Ease of Access

Completely OS and device agnostic access via any browser.

Ease of Management

Program and maintain your field installations remotely.

No Barriers for Connections

RMC provides connection even if the embedded device is behind a NAT router, firewall or proxy server

Cloud with Local Decision Making

Linear RMC database and decision making occurs on site at the local level

Great Hosting Features

Our device ecosystem functions as a host on the internet, addressable via its own URL and protected by the RMC server against unauthorized or malicious access

Key Benefits

- Program and manage anywhere, anytime
- Reduce the need to send technicians on-site to perform routine system maintenance and troubleshooting
- Increase customer support speed and satisfaction
- Generate recurring monthly revenues by offering value-added services
- Always up-to-date leading edge software

VALUE ADDED SERVICES
